The CAL range of Temperature Controllers

CAL Controls

The range of Autotuning P.I.D. Temperature Controllers with RS232/485 Communications and Charting & Logging Software

CAL the pioneer of temperature control

CAL is a dynamic modern company and was the first to develop the 48x48mm ($^1/_{16}$TH DIN) analogue controller in 1976, the first digital controller in 1986, and the first 24x48mm ($^1/_{32}$ND DIN) digital controller in 1992. CAL prides itself on technical competence, customer support and long-term supply of its range of controllers.

Model 9400
48 x 48 mm
($^1/_{16}$TH DIN)

Model 9300
48 x 48 mm
($^1/_{16}$TH DIN)

Model 3300
48 x 24 mm
($^1/_{32}$ND DIN)

CAL's temperature controllers

These controllers are designed for ease of use, low-cost and reliability in demanding applications. They are already widely used in many industrial applications such as plastics, packaging, drying, ovens & furnaces and laboratory & scientific equipment.

CAL's auto-tune makes P.I.D. control simple, just a few button presses will start the controller's self-tune which automatically selects the optimum P.I.D. values. Also CAL's unique dAC function is designed to minimise the overshoot problem associated with conventional P.I.D. control.

Functionality
- Easy-to-use Auto-tune program
- Simple menu-driven programming
- Full P.I.D. operation
- Single ramp/soak (dwell) program
- Heat-cool operation
- IP66 protection
- CE compliant

3-YEAR WARRANTY

Inputs and Outputs
