## MLC 9000+ Four Loop Controller Module

Each four Loop Module is an independent PID controller with 4 input and 6 outputs. Up to a max of eight Loop Modules can be connected to a single Bus Module making it possible to have up to 32 loops of independent control. Mixed installations of Single, Three and Four Loop Modules are possible. Each Loop Module can be removed and replaced (Hot Swapped) whilst the process is running.

- Heat/Cool operation
- Process \& Loop Alarms
